Project

Todos Application

[project1_link](#)

Technologies used : HTML, CSS, JS, Bootstrap

A task management solution, designed to make life easier.

- Streamlined task management through a combination of HTML, CSS, and Bootstrap for an intuitive interface.
- Seamless CRUD operations through JavaScript event listeners and dynamic UI updates.
- Secure task persistence with local storage methods, ensuring that your tasks are always available.

Wikipedia Search Application

[project2_link](#)

Technologies used : HTML, CSS, JS, REST API Calls, Bootstrap

A custom wikipedia search application that provides a simplified and intuitive way for users to access and view relevant information. With the ability to easily

search for and view curated results, users can dive deeper into their interests with just a click.

- Streamlined search results with HTML list elements, styled for a modern and user-friendly interface using CSS, Bootstrap and responsive design.
- Effortlessly access information with asynchronous fetch GET HTTP API calls and the option to open the desired result in a new tab for further exploration.

Countries Search

[project3_link](#)

Technologies used : HTML, CSS, JS, REST API Calls, Bootstrap

A powerful countries database, providing instant access to the world's countries and their populations.

- Responsive design through Bootstrap and CSS, combined with asynchronous data retrieval through REST API calls.
- Streamlined search functionality with JavaScript event listeners, input elements, and Array filter methods.

Certificates

Build Responsive Website
